## PROFILE

Full-Stack developer with 5+ years of hands-on delivery (since 2021): business websites, e-commerce stores and custom web apps. Strong in WordPress / WooCommerce and a modern JS stack (React, Next.js, NestJS, PostgreSQL). Comfortable owning products end-to-end - from discovery and UI to API, launch and iteration. Experience shipping for Ukrainian and European clients (including German-language storefronts and service sites). Actively use AI tools (Cursor, ChatGPT and similar) for scaffolding, debugging, refactoring and research - while keeping full ownership of architecture, code quality, reviews and final delivery. Prefer clear UX, maintainable code and production-ready releases.

## EXPERIENCE

### Full-Stack Developer
2025 - Present

**ImmerseTech**

- End-to-end delivery across frontend and backend for client and internal products.
- Build and extend React / Next.js apps, APIs and WordPress / WooCommerce solutions.
- Ship features, integrations and production improvements with full stack ownership.

### Front-End Developer | WordPress Developer
2023 - 2025

**ImmerseTech**

- Built and maintained production React interfaces for client and product work.
- Developed and customized WordPress solutions alongside the front-end stack.
- Shipped responsive UI, integrations and iterative product improvements full-time.

### Front-End | WordPress Developer
2021 - 2023

**Freelance**

- Delivered websites and online stores end-to-end - from layout to launch.
- Built WordPress / WooCommerce themes, catalogs, content models and React UI.

## EDUCATION

### Bachelor of Science (B.S.), Computer Science
2016 - 2020

**Vasyl Stefanyk Carpathian National University**

## SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS
Backend: Node.js, NestJS, Express, GraphQL, PHP
CMS / Commerce: WordPress, WooCommerce, ACF, Gutenberg, Elementor, WP REST API
Data: PostgreSQL, MySQL, MongoDB, Redis, Prisma
Other: Docker, Git, GitHub Actions, Firebase, Supabase, JWT, SEO basics

## SELECTED PROJECTS

**useTavio - HR SaaS platform** 2026
Immersetech product for teams of 5-50. Modular HR workspace that replaces scattered spreadsheets: recruiting kanban (contact to offer), smart time-off policies, shared team calendar, mood tracking, surveys and knowledge base. Full ownership of frontend and backend delivery.
**React / Next.js / NestJS / PostgreSQL / TypeScript | usetavio.com**

**UrbanScout - city quest platform** 2025
Browser-based GPS city adventures with no app install. Players purchase an access code, follow GPS quest routes and solve story-driven puzzles. Team mode, how-to-play guidance, FAQ and bilingual UA/EN product + marketing UI. Full ownership.
**React / Next.js / NestJS / TypeScript / PostgreSQL | urban-scout.space**

**Par'te Jewellery - e-commerce** 2025
Premium Ukrainian jewellery store with custom engraving (phrases, dates, handwriting-inspired personalization). Product catalog with variants, bestsellers, story-led homepage and complete cart/checkout flow. Full ownership.
**WordPress / WooCommerce / PHP | partejewellery.com.ua**

**Moroz Boden - service site (DE)** 2025
German marketing site for a flooring craftsman in Nuertingen: parquet, vinyl, leveling and skirting services, photo gallery, FAQ, customer reviews and a clear contact/lead path. Built for local service presentation and SEO. Full ownership.
**WordPress / PHP / Marketing site | moroz-boden.de**

**DELAVEGA Furniture - atelier store** 2024
European furniture atelier storefront (DE): handmade sofas, beds and armchairs with custom size/material options, catalog filters, delivery and warranty pages, plus EN/DE shopping experience for clients and designers. Full ownership.
**WordPress / WooCommerce / PHP / Multilingual | delavega.furniture**

## LANGUAGES

Ukrainian - native | English - reading technical documentation | German - beginner (A1-A2)
